Chapter 1

Zappy

Zappy — Multiplayer AI-based network game in C. Control autonomous agents, gather resources, evolve, and conquer in a world governed by TCP and time units.

Chapter 2

File Index

2.1 File List

Here is a list of all files with brief descriptions:

/home/stesson/Epitech/B-YEP-400/Zappy/src/GUI/ help.cpp	5
/home/stesson/Epitech/B-YEP-400/Zappy/src/GUI/ main.cpp	6
/home/stesson/Epitech/B-YEP-400/Zappy/src/Server/ help.c	8
/home/stesson/Epitech/B-YEP-400/Zappy/src/Server/ main.c	11
/home/stesson/Epitech/B-YEP-400/Zappy/src/Server/include/ server.h	10

Chapter 3

File Documentation

3.1 /home/stesson/Epitech/B-YEP-400/Zappy/README.md File Reference

3.2 /home/stesson/Epitech/B-YEP-400/Zappy/src/GUI/help.cpp File Reference

```
#include <iostream>
```

Include dependency graph for help.cpp:

Functions

- void `display_help()`
Display the help message for the GUI client.

3.2.1 Function Documentation

3.2.1.1 display_help()

```
void display_help (
    void )
```

Display the help message for the GUI client.

Definition at line 13 of file [help.cpp](#).

```
00013 {
00014     std::cout << "USAGE: ./zappy_gui -p port -h machine" << std::endl;
00015     std::cout << "\t-p port      port number" << std::endl;
00016     std::cout << "\t-h machine  hostname of the server" << std::endl;
00017 }
```

3.3 help.cpp

[Go to the documentation of this file.](#)

```
00001 /*
00002  ** EPITECH PROJECT, 2025
00003  ** B-YEP-400
00004  ** File description:
00005  ** Help message
00006  */
00007
00008 #include <iostream>
00009
00013 void display_help() {
00014     std::cout << "USAGE: ./zappy_gui -p port -h machine" << std::endl;
00015     std::cout << "\t-p port      port number" << std::endl;
00016     std::cout << "\t-h machine  hostname of the server" << std::endl;
00017 }
00018
```

3.4 /home/stesson/Epitech/B-YEP-400/Zappy/src/GUI/main.cpp File Reference

```
#include <iostream>
#include <string>
#include <cstring>
```

Include dependency graph for main.cpp:

Functions

- void `display_help()`
Display the help message for the GUI client.
- int `main`(int argc, char **argv)
Main function for the zappy GUI client.

3.4.1 Function Documentation

3.4.1.1 `display_help()`

```
void display_help (
    void )
```

Display the help message for the GUI client.

Display the help message for the GUI client.

Definition at line 13 of file `help.cpp`.

```
00013     {
00014         std::cout << "USAGE: ./zappy_gui -p port -h machine" << std::endl;
00015         std::cout << "\t-p port      port number" << std::endl;
00016         std::cout << "\t-h machine  hostname of the server" << std::endl;
00017     }
```

3.4.1.2 `main()`

```
int main (
    int argc,
    char ** argv )
```

Main function for the zappy GUI client.

Parameters

<code>argc</code>	Number of arguments
<code>argv</code>	Array of arguments

Returns

0 on success, 84 on error

Definition at line 20 of file `main.cpp`.

```
00020     {
00021         if (argc == 2 && (strcmp(argv[1], "-help") == 0 || strcmp(argv[1], "help") == 0)) {
00022             display_help();
00023             return 0;
00024         }
00025         return 0;
00026     }
```

3.5 main.cpp

[Go to the documentation of this file.](#)

```

00001  /*
00002  ** EPITECH PROJECT, 2025
00003  ** B-YEP-400
00004  ** File description:
00005  ** Main
00006  */
00007
00008  #include <iostream>
00009  #include <string>
00010  #include <cstring>
00011
00012  void display_help();
00013
00020  int main(int argc, char **argv) {
00021      if (argc == 2 && (strcmp(argv[1], "-help") == 0 || strcmp(argv[1], "help") == 0)) {
00022          display_help();
00023          return 0;
00024      }
00025      return 0;
00026  }

```

3.6 /home/stesson/Epitech/B-YEP-400/Zappy/src/Server/help.c File Reference

```
#include <stdio.h>
```

Include dependency graph for help.c:

Functions

- void `display_help` (void)
Display the help message for the server.

3.6.1 Function Documentation

3.6.1.1 `display_help()`

```
void display_help (
    void )
```

Display the help message for the server.

Display the help message for the GUI client.

Definition at line 13 of file help.c.

```
00014 {  
00015     printf("USAGE: ./zappy_server -p port -x width -y height -n name1 "

00028     printf("\tmatch_duration\tis the duration of the match in seconds\n");  
00029 }
```

3.8 /home/stesson/Epitech/B-YEP-400/Zappy/src/Server/include/server.h File Reference

This graph shows which files directly or indirectly include this file:

Functions

- void [display_help](#) (void)
Display the help message for the GUI client.

3.8.1 Function Documentation

3.8.1.1 display_help()

```
void display_help (
    void )
```

Display the help message for the GUI client.

Display the help message for the GUI client.

Definition at line 13 of file [help.cpp](#).

```
00013 {
00014     std::cout << "USAGE: ./zappy_gui -p port -h machine" << std::endl;
00015     std::cout << "\t-p port      port number" << std::endl;
00016     std::cout << "\t-h machine  hostname of the server" << std::endl;
00017 }
```

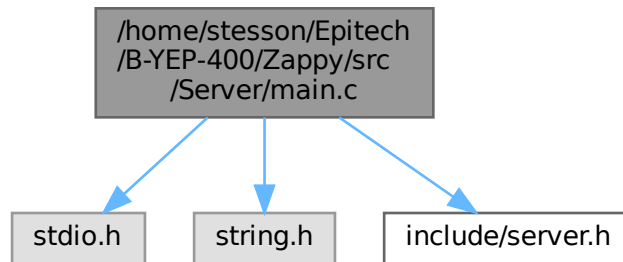

3.9 server.h

[Go to the documentation of this file.](#)

```

3.10 /home/stesson/Epitech/B-YEP-400/Zappy/src/Server/main.c File Reference

```
#include <stdio.h>
#include <string.h>
#include "include/server.h"
Include dependency graph for main.c:
```

Functions

- `int main (int argc, char **argv)`
Main function for the zappy server.

3.10.1 Function Documentation

3.10.1.1 main()

```
int main (
    int argc,
    char ** argv )
```

Main function for the zappy server.

Parameters

<code>argc</code>	Number of arguments
<code>argv</code>	Array of arguments

Returns

0 on success, 84 on error

Definition at line 18 of file `main.c`.

```
00019 {
```

```
00020     if (argc == 2 && (strcmp(argv[1], "-help") == 0
00021 || strcmp(argv[1], "help") == 0)) {
00022         display_help();
00023         return 0;
00024     }
00025     return 0;
00026 }
```

3.11 main.c

[Go to the documentation of this file.](#)

```
00001 /*
00002  ** EPITECH PROJECT, 2025
